

FLIGHT SCHOOL APPS

Custom Training Apps for Flight Schools.

WHAT ARE FLIGHT SCHOOL APPS?

Flight School Apps are custom mobile training apps for flight schools and airlines. They use high fidelity graphics, i-book reader technology, responsive flashcards and interactive quizzes to enhance your students study experience. The apps connect students and pilots by providing a platform to network from, search for flight crew positions, study for checkrides, and prepare for interviews.

HOW DOES IT WORK?

The Flight School App development team will design your flight school your very own custom mobile training app. This includes:

1. App Icon Creation – The app icon is a symbol of your flight school. We will use matching colors and graphics to parallel your logo and motto.
2. App Folder Creation – This folder contains all of your intellectual property, relevant training material, course curriculum, specific fleet information, aircraft specifications, flashcards, quizzes, limitations, memory items, files, notes, pilot operating handbooks, & weight and balance information.
3. Content Distribution Server – This server will communicate with the app store and is the platform used to upload updates and new content to your app.
4. Password Protected Account – Your flight school administrator will be given a password by the Flight School Apps team that will allow access to your app.
5. App Distribution to the iOS App Stores worldwide – 175 countries and regions will be able to access your flight school app.

APP PURCHASE OPTIONS

There is (1) option for flight schools to redeem their apps.

1. Add your flight school to Flight School Apps by becoming a member.
2. Once membership access is granted, your students, clients, and instructors will gain access to your proprietary information through in-app purchases of \$9.99 per aircraft app.

*A login password will be given to the admin of the flight school and can be distributed at user discretion.

Option (1) In-App Purchases - Password Protected with Proprietary Content Distribution to Students, Clients, & Instructors.

In-App purchases are \$9.99 per aircraft app download.

MEMBER BENEFITS

As a member of Flight School Apps, your flight school will receive unlimited access to update your app contents which include: aircraft information, manuals, publications, etc. at any time, 24/7. Each tail number in your fleet will have it's unique specifications within the app, and each student will have access to every aircraft at your school with individual in-app purchase downloads.

DEVELOPEMENT SERVICES FEE

A one time development fee of \$500.00 USD is required to begin app services.

WHAT's IN THE APPS?

Content:

- Flight manuals & POHs
- Study documents
- Written test prep
- Any FAA publication
- Checklists
- Student created flashcards
- Custom flight school videos made in-app
- If you want it in here, we can make it happen

Aircraft Information:

- Limitations flashcards
- All systems flashcards
- Follow up quizzes with all content
- High fidelity cockpit panels
- Aircraft systems schematics
- Memory items (if applicable)

General:

- Pilot to pilot forums and networking
- Aviation calculators
- Flight planning
- Worldwide weather
- Custom flash cards
- Zulu time
- Career advancement

DO YOU HAVE MY AIRCRAFT?

With 60+ aircraft makes and models, from light sport aircraft to heavy jets, chances are we have your aircraft ready to go. If not, we'll make it!

WHAT WILL MY APP LOOK LIKE?

iOS App Store
